

BIOMETRIX CPT

Custom Procedure Tray for Urology

Designed according to urological surgery setup requirements, Biometrix custom procedure tray for urology includes a wide range of high quality medical devices for various urological surgery procedures. Comprised of Biometrix's carefully selected single-use components, and tailored to answer individual needs; the tray enables immediate treatment in a completely sterile environment; addressing the major concerns of fluid control, infection, as well as patient and surgeon safety.

Biometrix Urology CPT provides a reliable and efficient procedure tray, ensuring high performance and significantly reducing overall surgery expenses.

- Manage emergency cases quickly and confidently
- Reduce cost and setup time of overall procedures
- Simplify and quicken stocking and restocking
- Minimize cross contamination with sterile single-use products
- Save space and minimize waste with compact packaging

PRODUCT BENEFITS

Biometrix offers an extensive choice of high quality components, allowing to create the optimized tray to save your organization time and money.

You are just a few steps away from your individual user-friendly Biometrix Urology CPT:

- Please select the components of your choice from the product range.
- Review the (non-sterile) sample tray, provided for your convenience.
- Discuss proposal and receive contract offer.
