Olympic Sterile-Driers

Safer drying and packaging

Olympic Sterile-Driers offer faster drying in bio-clean air. For safety and efficiency, they are the preferred driers following high-level disinfection. They are also ideal for drying equipment prior to low temperature sterilization.

Features

- Fast drying and large capacity
- Uses HEPA filtered air
- Flexible and convenient loading
- Protects the load while drying
- Provides short-term storage
- Rust proof aluminum construction

Safety

Olympic Sterile Driers use HEPA-filtered air to reduce the threat of airborne pathogens recontaminating wet, warm parts while they are drying. All heated air entering the drying chamber first passes through a pre-filter and then a HEPA filter which is 99.97% efficient in removing all particles larger than 0.3 micron.

Performance

Exclusive recirculating air system efficiently recaptures heated air to dry parts faster, reduce use of electricity, and prolong filter life. Olympic Sterile-Driers can handle large loads with almost any combination of tubes and parts.

Recirculating heated air and many other exclusive features

Pre-filters
Removes larger airborne particles. Front-mounted for easy replacement

HEPA filters
Separate HEPA filter for each drying chamber means greater air flow and longer filter life

Microprocessor-based temperature control

Digital countdown timer

Continuous or timed operation

Separate blowers
Each drying chamber has own blower for quieter operation and greater air volume

Heaters
Thermostatically controlled

Recirculating heat – for faster drying
More than 80% of heated air captured & recirculated through HEPA filters. Typical drying time is under 1 hour.

Forced vertical airflow
Tubes dry faster because air is forced through interior lumen of each tube

See-thru doors on all models.
Available with optional rear doors

Rust-proof
All aluminum construction

Outside vent attachment
(Optional, not shown)

Large drying capacity with up to 18 trays.
Model 44 shown with extra trays

Removable trays

Model 44 has nine large 18" x 18" (46 x 46 cm) parts trays standard. Model 43 has three 18" x 18" (46 x 46 cm) trays and six 18" x 9" (46 x 23 cm) half trays standard.

Bag Drier

Optional Bag Drier solves the problem of drying both the inside and outside of breathing bags. Slides into any Sterile-Drier model manufactured since 1984 and dries up to 16 bags at once.

Slide-out tube holder

Easy-loading tube-holders slide out at convenient height. Holds 35 tubes up to 5 ft. (1.5 m) long. Tube-holders can be replaced with more parts trays or Bag Drier.

Ordering Information

Model 43: With 3 full-size parts drying trays, 6 halfsize parts drying trays, and tube-holder for 35 tubes. 120V~, 60 Hz, 900 watts CAT. NO. 54343

Model 44: With 9 full-size parts drying trays and tubeholder for 35 tubes. 120V~, 60 Hz, 1700 watts CAT. NO. 54344

Note: Sterile-Drier models are available with optional rear doors and additional trays and tube holders

Accessories

Bag Drier: For use with any Olympic Sterile-Drier manufactured since 1984. CAT. NO. 54355
